WASTE MANAGEMENT

We all know that India is a developing country. When a country grows richer, people there have more money to buy things. They spend that money on more and more consumer products. More consumption of goods, leads to more waste matter. So, as we grow, we also increase our garbage. Therefore, we require proper waste management techniques. Garbage needs to be collected, managed and disposed of efficiently. We, as a nation, need to address this problem. It is an essential requirement for a good and healthy life.

There are three main ways to manage waste: recycling, landfilling and composting. Recycling is the process of converting waste into a new material. For example, used paper can be recycled to make book covers, bags, handmade paper, etc.

Landfilling involves burying garbage in a pit and filling up the pit again. But landfills require a lot of space and may also pollute local water supplies. Also, the stink from these landfills drives people away from areas around them. Landfills are the most common waste management practice in big cities.

In composting, organic matter such as leftover food, vegetable and fruit peels are piled up and allowed to decompose. This produces a compost which can then be used as manure.

Households can help by first segregating their waste into organic and inorganic waste. People can also dig their own compost pits and make manure. There is a growing awareness among people about waste management. If we manage waste properly, our city would be a cleaner and better place to live in.

I. Answer these questions.
   1. How does the economic growth of a country create more waste?
   2. What are the problems involved in the landfilling method?
   3. What can we do in our homes for proper waste management?

II. Find words from the passage that mean the same as:
   1. rubbish   ....
   2. unpleasant smell   ....

Activity VII: Let's unscramble

Re-arrange the following set of sentences to develop a story about two cats and a monkey. Indicate your arrangement by writing 1, 2, or 3 beside the sentences. The beginning of the story is already given within brackets.

(One day two cats found a piece of bread. They started fighting because they both wanted to eat the piece of bread.)

- He placed one piece in either side of the scales. Since one side was heavier, the monkey tore a small piece from the heavier side and ate it.

- Soon, a monkey came by. He asked the cats why they were fighting and offered to help them in dividing the bread.

- Finally, the monkey ate both the pieces of bread. The cats realized that they have been cheated by the monkey and went home sadly.

- He asked them to bring a pair of scales. When the cat brought it, the monkey tore the bread into two pieces.

- This time the other side became heavier. So, he tore another small piece and ate it.
